

<<Extremely impressed with
the accuracy and stability
of LuxaCrown.>>

- Dr. Hugh Flax

LuxaCrown

For **maximum strength,**
durable provisionals

A smile ahead together

Maximum strength and durability

DMG continues to be an innovative force in the provisional materials category, thanks to maximum strength, highly durable **LuxaCrown**.

LuxaCrown's durability makes it especially well-suited for complex provisional restorations and the long-term monitoring of treatment success. It offers the remaining tooth more protection to restore anatomical form, masticatory function, and is ideal for esthetic corrections.

FEATURES / BENEFITS

- Produces stronger provisionals
- Excellent fracture toughness
- High wear resistance
- Reliable durability
- Optimal mechanical properties
- Brilliant esthetics and polishability
- Time and cost savings

Tougher than the competition

LuxaCrown's high fracture toughness ensures **stable, strong provisional restorations**. Mechanical properties that include resistance to abrasion and fracture toughness also demonstrate its outstanding strength. **data on file.*

Esthetic and efficient

ADA Codes

02394,
02710

Easily and instantly increase both patient acceptance and practice revenue, without compromising quality. This affordable, high-strength option provides a faster, better way for patients to receive premium care.
